

2021

(See Ref. 2019.1).

Astronomical Calendar

This is an astronomical calendar. For each Saturday in the year, four Stars that appear in about **30 degrees** intervals in the night sky are selected. Also Planets that appear in the night sky are included in the list.

The times of Stars and Planets (except Mercury and Venus) are the **"The Mean Solar Transit Times"**. The Stars and Planets that are at Transit will be at its highest altitude, and appear directly to the north or south, **1 hour** for most constellations.

All times are obtained for **Point Zero** (at: 0° latitude/0° Longitude). However, the Solar Transit Times for Stars and Planets in Point Zero are equal to the Solar Transit Times of these Stars and Planets at any other point on earth with a margin of error that does not exceed **5 minutes**.

Also, the rise and set of the Sun, Moon, Mercury and Venus are also in "Solar Time". But, the margin of error for the **Solar Rise & Set** Times for the Sun (and other Objects) in Point Zero and other points on earth will be higher depending on the latitude of these points (for areas between 30N to 30S, the margin of error is about 1 hour). Therefore, the rise and set times in this calendar should be taken as **indicators**.

New And Full Moon Times are in **GMT**. Time is formatted as "hh:mm". **MB** (Moon Beta): Geocentric Ecliptic Latitude of the Moon, which varies between -5.27 to +5.27 degrees.

Mag: The Moon Angular Diameter, which varies between 0.49 to 0.557 degrees (avg 0.523).

Sag: The Sun Angular Diameter, which varies between 0.5244 to 0.5422 degrees (avg 0.533).

Hijri Months: **Mhr** (Muharram), **Srf**(Safar), **Rabi**(Rabi Awal), **Rabi** (Rabi Thani), **JmI** (Jumada Awal), **Jm2** (Jumada Thani), **Rjb** (Rajab), **Shm** (Shaban), **Rmd** (Ramadan), **Shi** (Shawwal), **Qdh** (Zul Qadah), **Hjh** (Zul Hijjah).

Hijri Months are obtained using **"The Rule of 29"**, which says that the New Moon occurs at the 29th day of the Hijri month. The results of this rule agree with 92% of fallop criteria, and 91% of SAAO criteria (the most two recognized criteria for crescent sighting).

For more info: "The Rule of 29" at <http://www.omr-minmd.voihsite.com>

Cross off weeks that have passed with a highlighter, so that the Calendar will be easier to follow.
